Dear whom this may concern,

Apprentice (ref 123)

I am writing in response to your advertisement for an apprentice i am very passionate about becoming a physiotherapist as i have grown up around people who work in health care. I am so passionate about this as i have been doing sport since i was in year 10 doing btech sport. And my passion for physio has only been growing. I currently am still doing all my research and widening my knowledge on physio because there is always something new to learn each day within this job. I think i would be perfect for this role as i am able and willing to keep widening my knowledge and skills. I have a few years' experience due to my family working close to physios in healthcare.

And i also am always asking questions to find out why and how they did something this shows that I am engaged and have done research before hand so I have knowledge going into the interview.

Yours sincerely,

(signature)
